

A "TYPICAL" PROFILE OF A PERSON IN THE EQUIPPING FOR MINISTRY PHASE (PHASE III)

At the beginning of the Equipping for Ministry Phase (III) the person demonstrates that he wants to minister to others; is concerned that others don't know the Lord.

During the Equipping for Ministry Phase he:

- continues to grow in his relationship with Christ.
- is consistently involved in a small group Bible study.
- begins to learn how to minister to people by learning how to share his testimony and the Gospel.
- begins to look outside of himself and have a burden for other people.
- learns ministry skills such as: preparing his testimony, learning to share the Gospel, and learning the basics of inductive Bible study.
- begins to take responsibility for tasks within the ministry.
- becomes aware of the spiritual battle he is in.
- understands and develops healthy relationships and ministry approaches.

By the end of this Phase the disciple is making ministry a priority in his life and has developed a desire and a vision for helping another person grow spiritually.
